

DISPENSING EQUIPMENT JET CLEANING UNIT

SKU: 30-0399

6.000,00 € excl. VAT

Categories: [Dispensing systems](#), [Modules](#)

BESCHREIBUNG

The Jet Cleaning Unit cleans the nozzle outlet of jet dispensers. The cleaning is realised by means of stripping movement on the nonwoven belt. After the cleaning process clean fleece is automatically fed.

Furthermore, the Jet Cleaning Unit has an integrated sensor which controls the remaining length of the nonwoven belt. When the minimum length is reached, a tape change message is issued. The cleaning cassette can be completely removed to ensure easy replacement of the cleaning tape.

For simple position calibration of the jet dispenser, the Jet Cleaning Unit has an integrated replaceable and easy-to-clean stainless steel plate.
